AOGR's Readers: U.S. Independent Oil & Gas Producers and Operators!

The American Oil & Gas Reporter's readers are solidifying their standing as the undisputed champions at unlocking and delivering the hydrocarbons necessary for every facet of life. Despite politically driven wish lists for alternatives, oil and natural gas are the bedrock of a healthy domestic economy and crucial to the wellbeing of every person in every nation.

Independent oil and gas producers and operators have proven repeatedly that they are up to the task of guaranteeing adequate supplies of oil and gas for consumers both at home and abroad. The U.S. Energy Information Administration announced in early November that domestic producers set an all-time crude oil production record of 13.2 million barrels a day, more production than any other country at any other time in history.

The U.S. industry is also achieving historic highs in crude oil exports, shipping nearly 4 million barrels a day. Even with highly anticipated new-build natural gas export facilities running ahead of schedule, America already has surpassed Qatar and Australia to become the largest liquefied natural gas exporter on the planet.

There is so much more in store for America's public and privately held independent producers and operators that AOGR has faithfully served for more than 65 years, along with the service, supply, manufacturing, and technology companies supporting AOGR's core producer/operator audience.

Against a backdrop of global supply insecurity, global crude oil demand is forecast to grow to 104.3 million barrels a day in 2024. The seemingly insatiable worldwide demand for LNG supplies also continues to expand at the rate of millions of cubic meters annually. According to the International Energy Forum, estimates of global LNG demand growth could top 25 percent in the next five years alone.

There is renewed interest in applying state-of-the-art technology to conventional onshore and offshore reservoirs. America is the focal point for independent operators and majors alike, as they optimize output in tight oil plays in basins from the Permian to the Powder River, while ramping recovery rates from world-class shale gas resources such as the Marcellus and Haynesville. To accomplish those tasks, they need to stay abreast of business drivers, shifting market dynamics, capital markets, and evolving ESG best practices.

For these companies, AOGR is the trusted, go-to resource for business news, regulatory and legal updates, capital market analysis, and razors-edge technical and operational knowledge.

The American Oil & Gas Reporter's editorial mission remains unchanged: Content from AOGR's network of oil and gas producer/operator associations, analysts, business leaders, and technical experts spanning exploration, drilling, completions and production empower readers with the technological and market information they need to succeed. AOGR provides the unique communications network that plays the crucial role for every link in the energy supply chain, promoting responsible development in all domestic producing basins to ensure American energy security while ensuring essential supplies can reach consumption points around the world.

AOGR's Schedule of Issues provides a road map for delivering tailored editorial and advertising messaging about the latest service, supply, and equipment solutions to all industry leaders—from C-suite executives, to operations managers, and field supervisors.

THE AMERICAN OIL & GAS REPORTER®

The American Oil & Gas Reporter's editorial integrity is respected the world over as being unique and original. Content sets the bar of editorial excellence with traditional journalism that readers and advertisers trust and respect. AOG is designed for oil and gas producers and operators, their allied geophysical, drilling and well fracturing contractors, and the equipment manufacturing, service and supply firms that serve them. The "Better Business" publication of the industry, AOG is especially tailored for U.S.-based independents.

Content reflects the interests of C-suite executives and operations managers in the legislative, regulatory, and financial market trends and developments that shape the economics of all operations. It also reflects their interests in new technology and its economic implications, as well as overall geophysical, geological and engineering innovations in the fields of exploration, drilling, completions and production of oil and gas, both as to methodology and equipment.

AOGR Also Works With These National Associations And Professional Societies:

American Association of Drilling Engineers

American Association of Petroleum Geologists

American Exploration & Production Council

American Gas Association

American Petroleum Institute

Domestic Energy Producers Alliance

EnerGeo Alliance

Energy Workforce & Technology Council

GPA Midstream

Gas Compressor Association

Gas Machinery Research Council

Independent Petroleum Association of America

International Association of Drilling Contractors

Interstate Oil & Gas Compact Commission

National Ocean Industries Association

National Stripper Well Association

Natural Gas Supply Association

Society of Exploration Geophysicists

Society of Petroleum Engineers

Society of Petrophysicists and Well Log Analysts

Southern Gas Association

And AOGR Tracks Developments In Academia And R&D Organizations, Including:

Advanced Energy Consortium, University of Texas at Austin

Artificial Lift R&D Council

Bureau of Economic Geology at the University of Texas

Colorado School of Mines/Reservoir Characterization Project

DOE's National Research Laboratories

Engines & Energy Conversion Laboratory,
Colorado State University

Exploration Geophysics Laboratory,
University of Texas at Austin

GTI Energy

Institute of Reservoir Characterization, University of Oklahoma

New Mexico Produced Water Research Consortium

Offshore Technology Research Center

Petroleum Technology Transfer Council

Southwestern Petroleum Short Course, Texas Tech

Subsea Engineering Research Group

University of Kansas Tertiary Oil Recovery Program

University of Tulsa Artificial Lift Project

Circulation Numbers

The American Oil & Gas Reporter magazine's reach of approximately 30,000 monthly magazine readers is based on a trade journal ratio of three-to-one readers per printed copy. Paid circulation of the magazine is approximately 10,000 copies. Source: Publisher's statement. The November United States Postal Service 2023 Statement of Ownership, Management and Circulation shows August 2023 mail copies, outside of Sedgwick County, Kansas, at 9,329. Source: USPS Form 3541-C (monthly update available upon request). The 2024 August press run was 10,300 copies. Source: AOGR Print Order to LSC Communications (monthly update available upon request). Circulation does not include the e-Edition, nor its shared university distribution. For additional information, please contact the Publisher at 800-847-8301.
